

There are reports from the USA, where the installation of smartmeters have increased energy bills by about 40%. Some smart meters have actually exploded and caused fires! A smart meter would be like having a CCTV in your home, monitoring ALL your home energy use. And could give utility companies the power to remotely alter your heating levels or your appliance and energy use without your approval.

A smart meter represents an invasion of privacy and a violation of the Data Protection Act. They are NOT mandatory and are NOT safe. You have the lawful right to refuse them.

THERE IS NOTHING SMART ABOUT  
A SMART METER!

PROUD TO BE SAFE NOT SMART - A smart meter free neighbourhood!

The residents of Huxhams Cross 'Green', Dartington, Devon have united in a decision to make their neighbourhood smart meter free. This decision was initiated by a few of the residents who decided to research the potential impact of the meters. They then took the initiative to talk to other residents about their thoughts and feelings regarding the introduction of the meters into their homes. Despite their different beliefs and reasons for concern, they were in agreement in their decision to become a smart meter free neighbourhood, for the four main reasons below.

1. The effects of radiation on our health and fertility.
2. Concerns about smart meters in connection with the imminent 5G roll out.
3. Concerns about privacy.
4. How valid is the proposed claim that smart meters will save us money?

Huxhams Cross residents hope this may empower others in the protection of our homes, streets and communities by igniting conversation, raising awareness and inspiring action.

Download this flyer/poster from [www.safenotsmart.co.uk](http://www.safenotsmart.co.uk) and send us a photo of yourself alone or with family and neighbours to upload to the site, lets make a visible stand together.
