

WHAT IS 5G?

IS A SMART METER REALLY SMART?

Do you want to live in a Smart grid? with Smart Cities and villages, Robots farming the land, and Self-driving cars? The Government has a clear ambition that the UK be a global leader in the roll out of the fifth generation wireless network (5G) and seeks to see the end of 'Not spots' (no more areas of no coverage!) The Government has already taken many steps to make planning regulations more supportive of swift infrastructure deployment and this process has commenced in Cornwall, Cumbria and Bristol University aswell as the roll out of the Smart meter grid everywhere in preparation for the Internet of Things (IOT). (www.gov.uk/5G)

In her recent testimony against the expansion of 5G in Michigan State Dr Sharon Goldberg states... 'Wireless radiation has biological effects. Period. This is no longer a subject for debate when you look at Pub-Med and the peer-review literature. These effects are seen in all life forms; plants, animals, insects, microbes. In humans, we have clear evidence of cancer now: there is no question. We have evidence of DNA damage, cardiomyopathy, which is the precursor of congestive heart failure, neuropsychiatric effects...5G is an untested application of a technology that we know is harmful; we know it from the science. In academics, this is called human subjects research' (<https://www.youtube.com/watch?v=CK0AliMe-KA>)

It is imperative that we now all educate ourselves as to what this technology, should it be rolled out as intended, could mean for the fabric of our lives here in the UK and all over the world.

BE SMART -DO YOUR RESEARCH

ARE YOU CHOOSING THIS?
